Press Release

January 2009

Attention Herb growers. Intrinsic Perennial Gardens, Inc. is excited to announce a new catnip. **Nepeta x 'Meow'** is a sterile hybrid of catnip and the perennial catmint. The light lavender blue flowers begin in early June and continue until the heat of summer at which time plants can be cut back for a new flush of foliage and flowers. These clumping plants have grey green foliage and flowering plants reach 24"+ tall preferring a well drained soil in full sun. Their hardiness is zone 5-9. For more information contact Brent Horvath at 800-648-2788 ext. 15 or brent@intrinsicperennialgardens.com
