## **PRESS RELEASE**

### **Sedum spurium 'Red Rock' And Sedum x 'Rolling Rock'**

February 2013

Intrinsic Perennial Gardens, Inc. is excited to announce the introduction of two new Stonecrops,

#### **Sedum spurium 'Red Rock'**

*Sedum spurium 'Red Rock'* is a red sport of 'Fuldaglut' with extremely vigorous growth habit.

Plants emerge with red foliage in spring. In July, the plants bloom deep pink to red. The short clumping plants only reach around 6" tall and around 12" wide or more. It prefers a well drained soil in full sun.

The hardiness is zone 3-9 and can it be planted in spring summer or fall. This new Sedum combines nicely with other low growing Sedums like *Sedum rupestre 'Angelina'*.

#### **Sedum x 'Rolling Rock'**

*Sedum x 'Rolling Rock'* is a hybrid of two US native stonecrops, *Sedum ternatum*, and east coast native and *Sedum spathulifolium* a west coast native. The extremely vigorous plants appear closest to *Sedum ternatum*. Evergreen plants begin to bud in early spring, blooming a creamy white in April. The short clumping plants only reach around 6" tall and 10" wide. It prefers a well drained soil in light shade but will tolerate full sun to part shade. The hardiness is zone 5-9 and it can be planted in spring or fall. This new Sedum combines nicely with other low growing Sedums.

Plants are available from Intrinsic Perennial Gardens, For more information on these contact Brent Horvath at 800-648-2788 ext. 15 or [brentH@intrinsicperennialgardens.com](mailto:brentH@intrinsicperennialgardens.com)
